# MEMORY ERROR READING PDF

© Darry D Eggleston, 813.677.2871, [DarryD@darryd.com](mailto:DarryD@darryd.com)

When trying to read a Adobe portable document format (PDF) online in “Darry D’s Lessons” < <http://darryd.com> >, I got an error message (Figure 1).

## FIX

The problem is not with Internet Explorer; the problem is with Adobe Reader. To fix it:

Figure 1

1. Close Internet Explorer.
2. Open Adobe Reader.
3. Click on Edit > Preferences.
4. Click on “Internet” in the left column.
5. Remove the check from “Display PDF in browser” (Figure 2).
6. Click on “OK” button.
7. Exit the program by clicking on the “X” in the upper-right corner of the window.
8. Open Internet Explorer.
9. Read the same document as before. This time there will be no problems.
